

TOWN OF WEST YELLOWSTONE

PRESS RELEASE

June 2, 2020

For the last several months, the Town of West Yellowstone has been preparing for positive coronavirus cases. Working with regional and local partners, the Town has implemented all prescribed protocols to ensure the safety of the public. Utilizing the plan we have in place, the West Yellowstone community can deal with any positive cases that may arise. The two current positive tests were taken Friday, well in advance of the Park opening. The Town and our businesses will continue working closely with the Gallatin County Health Department to protect our citizens and visitors. Our hotels, restaurants, and shops are prepared to welcome visitors while taking the necessary precautions to ensure everyone's safety. The Town of West Yellowstone invites you to come experience our hospitality and enjoy Yellowstone National Park!
